EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 34, none of the prior art of record teaches or discloses an exposure apparatus which exposes substrate by radiating an exposure beam through a liquid, the exposure apparatus comprising a mover, an interferometer system, and a memory which stores, as first information, error information about an error of the reflecting surface of the interferometer system obtained in the presence of the liquid supplied or formed onto the mover.

Regarding claim 13, none of the prior art of record teaches or discloses an exposure apparatus which exposes substrate by radiating an exposure beam through a liquid, the exposure apparatus comprising a mover, a driving unit; and a control unit which controls the driving unit and which includes first control information for moving the mover in the presence of the liquid supplied onto the mover, and second control information for moving the mover in the absence of the liquid supplied onto the mover.

Regarding claim 18, none of the prior art of record teaches or discloses a position control method comprising measuring error information about an error of the reflecting surface in the presence of the liquid supplied onto the mover, and controlling the position of the mover on the basis of the error information.

Regarding claim 30, none of the prior art of record teaches or discloses an exposure apparatus comprising an exposure station, a measuring station, a mover movable between the stations while holding the substrate, a driving unit, a control unit controlling the driving unit and which includes first control information for moving the mover in the presence of the liquid

supplied onto the mover, and second control information for moving the mover in the absence of the liquid supplied onto the mover.

Regarding claim 40, none of the prior art of record teaches or discloses an exposure method comprising holding the substrate or a dummy substrate on a mover, determining error information about an error information about an error of the reflecting surface in the presence of the liquid supplied onto the mover; and projecting the pattern image onto a predetermined position on the substrate through the liquid on the basis of the error information.

Akimoto (2006/0028630) discloses an exposure apparatus and method which changes control parameter of the stage and the driving profile of the stage according to liquid immersion conditions, but is not available as a prior art because applicant have perfected the foreign priority.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
